

Abdul Moiz

moizamz.dev@gmail.com | +92 304 4855094 | linkedin.com/in/moizamz

Objective

Motivated Computer Science student with strong academic foundation and hands-on experience in software development and machine learning. Skilled in OOP, Data Structures, Algorithms and Problem Solving, with an ability to develop efficient and scalable solutions. Seeking opportunities to contribute technical expertise in a dynamic and growth oriented environment.

Education

BS Computer Science

May 2026

School of Electrical Engineering and Computer Sciences (SEECS), NUST — Islamabad, Pakistan

Relevant Coursework

Object oriented Programming, Data Structures and Algorithms, Design and Analysis of Algorithms, Operating Systems, Web Engineering, Artificial Intelligence, Machine Learning, NLP, Computer Networks, Software Engineering, Parallel and Distributed Computing, Information Security, Network Security, Mobile Application Development, TAFL.

Experience

Full Stack Developer Intern

March 2025 – July 2025

Bitsmiths Studio, Islamabad, Pakistan

Worked on full-stack web applications using React, Node.js, and ASP.NET Core. Built RESTful APIs, integrated frontend and backend, managed data with MySQL and MongoDB, and implemented authentication and session handling. Collaborated with the team through Git, learning practical full-stack development, API design, database management, teamwork, and improving problem-solving and debugging skills.

Machine Learning Intern

June 2024 – Aug 2024

HPC Lab, SEECS, NUST, Islamabad, Pakistan

Worked on real-world datasets to build ML models like Decision Trees, Random Forests, KNN, and SVM. Performed data preprocessing, feature engineering, and model evaluation using scikit-learn and TensorFlow, applying cross-validation and hyperparameter tuning. Gained experience in the complete ML workflow, improving model performance and developing analytical and problem-solving skills.

Projects

Personalized LMS (*RL-based*): Adaptive learning management system leveraging reinforcement learning for personalized content delivery.

SafePak - Online FIR Registration App: Mobile-based application enabling citizens to register FIRs digitally, improving accessibility, transparency, and response efficiency.

LudoAI (*Q-learning based*): Developed a reinforcement learning agent capable of learning optimal gameplay strategies.

E-Commerce App - Online Shopping Platform (*Flutter, Firebase*): Developed a cross-platform app with authentication, product management, cart, and real-time database integration.

Online Ticket Booking App (*Web based*): Designed a web platform for seat selection, booking management, and secure user authentication.

Chatting Application using Socket Programming: Implemented real-time client-server communication using TCP sockets with message synchronization.

NoteX AI-Powered Notes Taking App: AI-assisted notes application with summarization and organization

E2E Secure Message Exchange System: Designed an end-to-end encrypted message exchange system implementing secure key exchange and encryption protocols.

Pakistani Cultural Clothes Classifier, Mushroom Edibility Classifier, Turing Machine Simulator

Technical Skills

Languages: C/C++, C#, Python, Java, Dart
JavaScript/ TypeScript

Frameworks & Technologies: .NET, ASP.NET Core, Blazor, Angular, React, Node.js, Express, Flutter, RESTful APIs

Databases: MySQL, SQLite, NoSQL, MongoDB, Hive

Architectures: Clean, MVC, MVVM

Tools: Git/GitHub, Visual Studio, VS Code, IntelliJ, Google Colab, UI/UX Design

Concepts: OOP, DSA, Algorithms and Complexity Analysis, AI/ ML Basics, Software Development Lifecycle and Design Patterns, Database Design, Operating Systems Concepts, Information and Network Security

Languages

English (Fluent), Urdu (Native)
